

Specialists for cable storage and processing

From small devices to machine installations

The world of winding technology

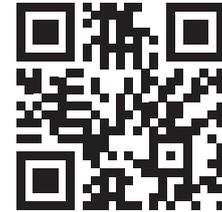

Kabelmat is a subsidiary of Helukabel GmbH and is one of the market leaders in the field of winding, measuring and storage technology for the cable and wire industry and many other sectors. Kabelmat offers a wide range of solutions for processing cables, wires, pipes, steel cables, hoses and profiles.

We optimise your production processes

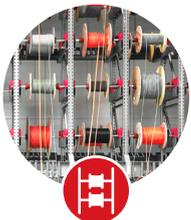

The demands on manufacturing companies are increasing. Efficiency, cost savings and relieved burden for employees are increasingly in the foreground. We have appropriate solutions in all degrees of automation, completely tailored to the individual customer requirements.
