Drag chain systems

We offer a wide range of steel and plastic drag chains with short lead times. This is what sets us apart. Customised solutions are available for any application in terms of stability or installation space. Our team is at your side right from the beginning and will provide guidance and service when it comes to material selection, design specification, assembly and commissioning.

Drag chains made of plastic, steel or hybrid

Self-supporting, gliding, for the smallest installation spaces and heaviest weights

Guide system in the catalogue and as an individual project solution

Cables

We are a reliable partner for our customers from industry and infrastructure with more than 63 own production and sales locations in 39 countries. With a comprehensive range of over 33,000 stock items and customised special cables, we supply electrical connection technology from a single source.

Control, data & bus cables as well as drive technology in different sheath qualities

Sheath materials:

- PVC
- PUR
- TPE

Bending factor at 5x Ø and movement distances up to 450 m

Meticulously produced, tested in practice and with the necessary approvals

Assemblies

Highest standards of quality and reliability define our cable assembly services. We provide a comprehensive selection of motor and feedback cables, data cables in copper or fibre optic, and customised cable assemblies. Thanks to our advanced automated systems and sophisticated order logistics, we can provide you with appealing terms and rapid delivery schedules.

Prototype to serial production

Production, Storage & Logistics

In-house manufacturing know-how

- 50,000 m² production area
- 26 extruders, 20 stranding machines & 60 braiding machines
- Cables & wires from 0.05 to 1000 mm²

Storage for your project

- 33,000 items in stock
- 40,500 pallet spaces & 36,800 container slots
- 38 logistics locations worldwide for 24-hour lead times

Delivery to any location

- Pick up yourself
- Delivery by truck
- Delivery by air freight
